¹ Program codes can only be used for one college at a campus. For example, if college A at Hilo is using program code BA-BIOL, then college B at Hilo will not be able to use that program code. College B will then modify the code by adding the college to the end of the code, ie BA-BIOL(B) or BA-BIOL/B. This will also hold true when a program is being moved from one college to another. Program codes used at one campus, can be used at another campus only if it is the same program.
