P) Proposal Details

P.1) This is a proposal for:

Modification of an existing undergraduate or graduate program, degree, minor, or certificate

P.2) Proposal Summary

- Modification of KES core courses (includes the introduction of brand new courses, re-naming current core courses, removing current core courses and adding in other existing courses)
- Modification of KES track-specific core courses (includes the introduction of brand new courses, re-naming current core courses, removing current core courses and adding in other existing courses)
- Changing of track names

P.3) Proposal Rationale/Justification

This program modification is critical for us to better prepare our students to enter allied health careers and graduate programs. A review of other Kinesiology programs around the country revealed holes in our curriculum. Previously, we could not offer these important courses because we did not have faculty to teach them. We recently hired two new faculty members that have the specific expertise to now teach these courses and add them to our curriculum. This new curriculum not only better aligns our program with other Kinesiology programs across the country, but we specifically modified the curriculum keeping UH Manoa's program in mind. In preparation, our department met with the Chair of UH Manoa's Kinesiology department. Their department offers a graduate program in Athletic Training and just got approval for a Doctor of Physical Therapy program. It is imperative we modify our curriculum so students are prepared to apply and succeed in these programs.

P.4) Related Course(s)

- KES 212: New course: Anatomical Kinesiology
- KES 348L: New course: Exercise Physiology Lab
- KES 307 and 307L: New course: Biomechanics of Human Movement and Lab
- KES 210: Change from 2 credit to 3 credit course
- KES 308: Proposed title change: Principles of Strength and Conditioning
- KES 311: New course: Tests and Measurement in Sports and Exercise
- KES 310: Proposed Title Change: Motor Learning

P.5) Course(s) from Other Departments

Yes

Courses

Added pre-requisites for proposed new course KES 312, Biomechanics of Human Movement (Physics 151 and Physics 151L). Previously we only required Human Anatomy and Physiology I and II lectures. We are now requiring the labs for these lectures in our core curriculum (BIO 243L and 244L).

P.6) Proposal Impact(s) - Resources

Lab space is required for the two proposed courses in the KES core curriculum. A proposed facility for lab space is the old gym which is currently being partially occupied by the Dance program.

1) Program Information

1.1) Degree Type

Bachelor of Arts

Proposed**1.2) Program Description**

The KES program focuses on the study of health and human performance. Students in the degree program will study foundational courses such as anatomical kinesiology, exercise physiology, nutrition, biomechanics, motor behavior, social/psychological aspects of physical activity, and health promotion. Successful degree candidates will complete the UH Hilo general education requirements, set of core KES courses, and complete selected courses to fulfill one of three specialized tracks. Students can choose between the Allied Health, Applied KES, and Health Promotion tracks. Below is a short description of each track, as well as some possible career options.

The Allied Health Track provides education and training for students who wish to prepare for advanced study in physical therapy, medicine, or other allied health fields.

Career Options: Physical Therapist, Athletic Trainer, Occupational Therapist, Chiropractor, Sports Medicine, Physician Assistant, Exercise Physiologist, Biomechanist.

The Applied KES Track provides students the opportunity to pursue basic and applied studies of the physiological, biomechanical, and social-psychological aspects of human movement and performance.

Career Options: Coach, PE/Health Teacher, Health Club or Gym Administrator, Instructor, or Trainer, Sport Management, Strength and Conditioning Coach, Director of Youth Camps/Sports Programs.

The Health Promotion Track gives students a deeper understanding of health issues, human behavior, and their impact on overall wellness and quality of life.

Career Options: Health Program Manager or Coordinator, Health Educator, Health or Life Coach, Epidemiologist- Physical Activity, Non-profit work, Public or Government Sector.

Existing**1.2) Program Description**

The KES program provides students with a diverse range of high quality instruction and opportunities within the areas of health, physical education, recreation, and the exercise sciences. Furthermore, activity courses provides individuals with exposure to a variety of physical activities and opportunities to enhance their overall well being. Lecture type courses provide introductory and advanced preparation for the fields of education, management and/or coaching, health promotion, and the exercise sciences with include sport psychology, athletic training, physical therapy and exercise physiology.
