

ADDITIONAL COMMENTS

The BA-HUM is currently an established degree program; this MATH concentration would prepare students in areas requiring a strong foundation in mathematics, or for success at the graduate level, either in mathematics or a related discipline.

This program will also support the BEd in Secondary Education-Mathematics, Secondary and Mathematics Middle Level, as well as attract new students with an interest in the fields of pure and/or applied mathematics.

Action Requested (✓ one):

- Delete Program ✓ Add Program

1. If deleting a program, indicate:

- a. Name of existing program
- b. Location of primary references to modified course in current catalog (e.g., SSCI 305 mentioned on pp.37 and 77):

If deleting a program, proceed to #4.

2. If adding a program, indicate:

- a. Name of proposed program

Bachelor of Arts in Humanities with Concentration in Mathematics

- b. Program narrative:

The BA in Humanities with Concentration in Mathematics (BAHM) is a four-year program which prepares students with a foundation in the liberal arts to serve professional, career-related, and applied fields, based on state and regional needs. The program is designed to prepare its students for successful careers in secondary education and other areas requiring a strong foundation in mathematics, or for success at the graduate level, either in mathematics or a related discipline. The degree is intended to familiarize students with a wide range of areas within the field of mathematics, and to instill in them an appreciation for the rigor and structure of the discipline.

The mathematics program is designed to give the undergraduate a broad background in modern mathematics and its applications. The upper-division mathematics courses represent a core leading to further work in mathematics or mathematically related areas or careers in mathematics education. Applications may be pursued in such areas as systems theory, statistics, and geometry, mathematical modeling, which are widely used in computer science, business, and the physical, life, and social sciences.

Upon completion of the program, the student will be able to demonstrate the following knowledge and skills:

1. A general understanding of the different areas of mathematics and its applications, and how they interrelate, and the importance of mathematics in a scientifically-oriented society.

2. Classical theorem-proving skills, which include the ability to reason quantitatively and to apply the rigor necessary to construct proofs, proofs by contradiction, and proofs by induction.
3. A refined understanding of the problem-solving process, formulate definitions, give examples and counterexamples, and make inferences and generalizations.
4. Experience conducting research and reading, writing, and articulating mathematically-related material without supervision.
5. A working knowledge of technology appropriate to the field.
6. The skills necessary to solve problems using a variety of techniques, including algebraic, numerical, and spatial reasoning through visualization.

c. Program requirements (e.g. number of credits required, specific courses required, etc.)
Please see attached Draft Academic Advising Sheets for the BAHM requirements.

d. Proposed courses for the program

Course Alpha & Number	Course Title
MATH 241	Calculus I
MATH 242	Calculus II
MATH 243	Calculus III
MATH 244	Calculus IV
MATH 307 or 311	Linear Algebra and Differential Equations or Introduction to Linear Algebra
MATH 321	Introduction to Advanced Mathematics
MATH 327	History of Mathematics
MATH 331	Introduction to Real Analysis
MATH 371	Elementary Probability Theory (Statistics)
MATH 304	Mathematical Modeling
MATH 480	Senior Seminar
MATH 491	Senior Project (Note: CC 1 form proposed to Curr. Committee on Feb 2017)

Note: For addition of courses, forms CC1 should already have been completed and submitted.

3. Will the proposed program addition require any additional resources? No Yes
If "yes," please explain:

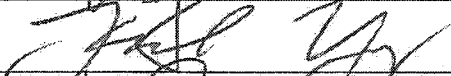

Justification or rationale for program action (deletion or addition)

This program will prepare students for successful careers in areas requiring a strong foundation in mathematics, or for success at the graduate level, either in mathematics or a related discipline. Additionally, this program, deeply rooted in the liberal arts tradition brought forth by the studies in Humanities, is designed to produce well-rounded graduates, having the ability to bridge technical skills with communication skills as well as ethical discourses and analysis.

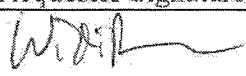

This program will also support the Secondary Education – Mathematics and Middle Education – Mathematics degrees, as well as attract new students with an interest within the field of pure and/or applied mathematics.

4. Have all relevant personnel been consulted? No Yes

UNIVERSITY
of HAWAII®
WEST O'AHU

Vice Chancellor for Academic Affairs Office

February 2, 2018

MEMORANDUM

TO: Dr. Donald Straney
Vice President for Academic Affairs

VIA: Dr. Maenette Benham
Chancellor *Maenette Benham*

FROM: Dr. Jeffrey Moniz *Jeffrey Moniz*
Vice Chancellor for Academic Affairs

SUBJECT: Request for program codes for new UHWO concentrations in Mathematics and Community Health; and a Subject Certificate in Music

The following new concentrations and subject certificate have been approved by the Chancellor at UH-West O'ahu:

- 1) New concentration for the BA-HUM: Mathematics
Approved: 03/01/17
Effective: Fall 2018
- 2) New concentration for the BA-PUBA: Community Health
Approved: 01/23/18
Effective: Fall 2018
- 3) New subject certificate SC-HUM in Music
Approved: 01/23/18
Effective: Fall 2018

The requests for the new codes with supporting documents are attached. If you have any questions, or need additional information, please contact Terri Ota (tota@hawaii.edu; phone: 689-2314). Thank you.

c: Pearl Iboshi, Director, IRAO
