Justification to warrant a new major/concentration code similar to an existing major/concentration code:

At the time of the complete overhaul of the DMED Program and the incorporation of courses from the TVPR Program in Fall 2022, it was decided that 3 specializations were the optimum amount to offer.

The DMED Program has now decided to overhaul and reactivate the Creative Media Specialization since HCC has since decided to terminate their Graphics Program, and due to receiving many inquiries by incoming students who are looking for such an area of study.

Is this major/concentration code being used the same way at the other UH campuses? Yes No

Should this program be available for applicants to select as their planned course of study on the online application? *If yes, student may select the code as their only program of study.* Yes No

Degree: Associate in Science

Title: Digital Media Production

Description: The Associate in Science in Digital Media Production provides creative individuals with the art and design training needed to explore and express ideas using leading-edge technology and skillsets. Students receive integrated digital media training in one of four specializations: Animation and Motion Graphics, Creative Media, Digital Photography, and Digital Video for the Web. Students become life-long learners, developing the skills required for a vast array of digital media communications, graphic design, photography, two-dimensional and three-dimensional animation and video production.

Effective Date: Fall 2023

Program Modifications:

Addition of the Creative Media Specialization. Also adding DMED 131, Introduction to Digital Video and Deleting DMED 295, Project Production to the Digital Photography Specialization.

After discussions with current Digital Photography Instructors and advisory board members, it was felt that the contemporary photographer should know how to utilize their Digital Single Lens Reflex (DSLR) and Mirrorless cameras as a video camera to expand their skills and knowledge to improve their marketability in industry.

There were several requests to return the Creative Media Specialization to the Digital Media (DMED) Program. With Honolulu Community College (HCC) diminishing their Graphics Program, there is a need to fill the void of a program that has a graphic heavy curriculum. Note that students will also learn Digital Photography and Video Production to further their skills so that they could potentially utilize them as social media content creators.

Degree: Associate in Science

Title: Management

Description: The program is designed primarily to prepare students for entry-level positions in business, industry, and non-profit organizations. It is designed to build a firm foundation of basic managerial knowledge and skills to begin a career in business and to provide continuing management education for current employees seeking to upscale their business skills. Students who earn an Associate in Science in Management may optionally elect to specialize in Entrepreneurship or Hospitality and Tourism or Office Administrative Assistant.

Effective Date: Fall 2023

Program Modifications:

The program modification is to the Program Curriculum Plan for Specialization Entrepreneurship. The modification is to add BUSN158 Social Media and Cloud-Based Collaboration for Business as an alternative to ECOM 100, Introduction to E-Commerce, if a student elects to focus on social media to enter the online market place.

In addition, a new Specialization is being added to the Plan. The addition will provide students the opportunity to secure a position with organizations as an office administrative assistant. The new Specialization named Office Administrative Assistant is comprised of four courses:

- BUSN 123: Word Processing for Business
- BUSN 164: Career Success
- BUSN 158: Social Media and Cloud-Based Collaboration for Business
- BUSN 170: Records & Info Management

With the addition of this specialization, the program provides a wider assortment of managerial positions for students seeking a career in business.

The modification of the program increases the student career opportunities by expanding into new categories of management positions, while still being aligned with Division goals, College Strategic Plan, and College Mission Statement. It also closely aligns the program to Kauai Community College's AS in Business and Maui College's AAS in Business Administration.

Degree: Certificate of Achievement

Title: Digital Media Production

Description: The Certificate of Achievement in Digital Media Production is designed to provide the student with entry-level skills or job upgrading for positions under direct supervision in Multi-Media in various specialization areas including Animation and Motion Graphics, Creative Media, Digital Photography, and Digital Video for the Web.

Effective Date: Fall 2023

Program Modifications:

Addition of the Creative Media Specialization. Essentially the same as the old program (below), just adding the Creative Media Specialization to the following:

All required courses must be passed with a grade of C or better.

Certificate of Achievement in Digital Media

Requirements (30 credits):

General Education (6 credits)

1) GENERAL INFORMATION

1.1) Effective Term

Fall 2023

1.2) Program Title

Digital Media Production

1.3) Degree Type

Associate in Science (AS)

1.4) Description

The Associate in Science in Digital Media Production provides creative individuals with the art and design training needed to explore and express ideas using leading-edge technology and skillsets. Students receive integrated digital media training in one of four specializations: Animation and Motion Graphics, Creative Media, Digital Photography, and Digital Video for the Web. Professional Arts and Technology

2) PROGRAM LEARNING OUTCOMES

2.1) Outcomes

Utilize critical thinking and problem-solving skills for digital media projects by planning and using necessary collaborative skills.

Communicate in a clear and concise manner using digital media techniques appropriate for the intended audience.

Identify and explain digital media standards of professionalism as they pertain to personal and work-related endeavors.

Exhibit a portfolio of digital media projects related to the chosen specialization at the conclusion of the Associate in Science degree work.

3) BOR INFORMATION

3.1) Program Justification

The program objectives are in line with the objectives and initiatives as stated in The University of Hawaii's Community Colleges Strategic Directions 2015–2021:

"UH Community Colleges are an integral component of the workforce development in the state and a leader in identifying workforce needs and developing and delivering training programs to enable students to gain employment."

<http://uhcc.hawaii.edu/ovpcc/strategic/strategic_directions.php>

The strategic plan comprises of the Hawaii Innovative Initiative which cites, "...this plan outlines a strategy to develop a more robust workforce planning and management system while at the same time committing the UH Community Colleges to developing and delivering degree and certificate programs in already identified emerging workforce areas such as cyber security, information technology, and big data, sustainability and emerging green jobs, sustainable agriculture, biotechnology, medicine, engineering, **digital media**, and other high tech occupations."
<http://uhcc.hawaii.edu/ovpcc/strategic/strategic_directions.php>

According to the Board of Regents, in a presentation in Fall 2020, Powerpoint slide number 8, titled "UH Must Help Grow New Economic Sectors and Develop New Approaches to Old Ones", Creative Media Industries is cited as one area for development.
<http://www2.leeward.hawaii.edu/facultysenate/sites/default/files/bor_meeting_materials.8.20.2020_-_repositioning_and_vision.pdf>

According to the US Bureau of Labor Occupational Outlook Handbook, there is a projected growth rate of 3% for Graphic Designers between 2021-2031.

<<https://www.bls.gov/ooh/arts-and-design/graphic-designers.htm>>

Unfortunately I could not locate government labor statistics on social media content creators, but it is apparent that there is a growing need for individuals with these skills.

3.2) Program Mission and Objectives

The overall objective of the Digital Media Program is to prepare students for immediate and future employment and career advancement.

The overall objective of the Associate in Science in Digital Media Production is to prepare students for entry-level jobs in Digital Media. The learning objectives will give students the ability to develop their technical, creative, and soft skills to work in the creative media industry. This includes the ability to master industry-standard software applications, work collaboratively in teams, and create and complete projects designed with a specific message to a target audience.

The program is designed to include courses with SLO's that specifically address Leeward Community College's Institutional Learning outcomes:

Critical Thinking and Problem Solving

Our graduates are able to examine, integrate, and evaluate the quality and appropriateness of ideas and information sources to solve problems and make decisions in real-world situations.

Written, Oral Communication and Use of Technology

Our graduates are able to use written and oral communication and technology to discover, develop, and communicate creative and critical ideas, and to respond effectively to the spoken, written, and visual ideas of others in multiple environments.

Values, Citizenship, and Community

Our graduates, having diverse beliefs and cultures, are able to interact responsibly and ethically through their respect for others using collaboration and leadership. Our graduates are able to engage in and take responsibility for their learning to broaden perspectives, deepen understanding, and develop an aesthetic appreciation and workforce skills.

The following is a concise survey of objectives for each specialization:

Animation and Motion Graphics: Produce 2-D and 3-D animation by generating ideas using independent judgment, creativity, and computer software for content creation.

Creative Media: Produce printed and electronic graphic designs by utilizing technical, creative, and artistic expertise. In addition, digital photography and video production skills will equip students with the ability to create digital content for social media platforms.

Digital Photography: Demonstrate competence in the production and processing of images with current electronic photographic tools and the application of all applications of electronic media to all areas of artistic and commercial photography.

Digital Video for the Web: Produce attention-grabbing communication design for film, television, music videos, and the Web while meeting industry standard specifications.
