KAPI'OLANI COMMUNITY COLLEGE
University of Hawai'i
PROGRAM ACTION REQUEST (form 11/12/13)

1a. **Type of Program Action:** Addition

1b. **Type of Modification:** Addition of an Academic Subject Certificate (ASC)

1c. **Approval to Plan (ATP):** n/a

2. **Program Type:** Marine Options Program (MOP) Academic Subject Certificate

3. **Program Name and Program Description:** The Marine Options Program (MOP) is a unique University of Hawai'i (UH) system wide program available to students at all UH campuses. Through MOP, students from any field of study can obtain a marine related focus within their own degree while earning an Academic Subject Certificate. MOP emphasizes experiential-based, cross-disciplinary education and provides opportunities to apply traditional coursework to practical hands-on skills through a marine related internship or research project. An Academic Subject Certificate in MOP is a credential awarded to students who earn a minimum grade point ratio (GPR) of 2.0 in 12 credits of academic coursework. This includes four credits of required coursework, six credits of marine related electives, and two credits of independent study to facilitate a unique MOP skill project where students (with faculty guidance) design and conduct a personal marine or aquatic project related to their educational goals. Completion of the MOP certificate will enhance student success in obtaining employment in any occupation where enhanced ocean awareness is applicable, or for further study at a 4-year institution.

4. **Effective Term:** Fall 2015

5. **Add pages in the 2015-2016 version of the KCC General Catalog:** Page 142 add MOP to the list of Academic Subject Certificates offered under the Liberal Arts degree. Page 144 add MOP to the AA in Liberal Arts table:

| CAREER OPTIONS | ACADEMIC OPTIONS |
|--|--|
| Specialization within an AA degree. Entry level position using knowledge related to Hawai'i's marine environment. | Academic Subject Certificate – Marine Options Program (12 credits) |

6. **Is this program at another UH Campus?** Yes, all 10 UH campuses have MOP

7. **Justification:** The goal of the Marine Option Program (MOP) is to provide experiential, marine-oriented opportunities for students in all majors throughout the University of Hawai'i's 10 campuses. Now in its 42th year, MOP helps to guide the career paths of students from any discipline with a passion and appreciation for the ocean, some of who may become tomorrow's ocean leaders. Unique to Hawai'i, MOP provides hands-on training and networking through classroom and field experiences, preparing them for jobs in Hawai'i's marine centric tourist job market and multiple local, state and federal ocean-oriented agencies. The MOP ASC will allow students to explore how the ocean can relate to their educational and career goals. MOP does not target any specific career path or endpoint, rather it augments all career options by providing an ocean perspective unique to Hawai'i's intimate relationship with the surrounding sea.

FROM: Mackenzie M. Manning, Math & Science Department

SUBJECT: Addition of a 12 credit Marine Options Program (MOP) Academic Subject Certificate (ASC) under the Associates in Arts (AA) in Liberal Arts degree program

SPECIFIC ACTION REQUESTED: Approval is requested for the creation of a new MOP ASC in the AA in Liberal Arts degree program.

Program description: The Marine Options Program (MOP) is a unique University of Hawai'i (UH) system wide program available to students at all UH campuses. Through MOP, students from any field of study can obtain a marine related focus within their own degree while earning an Academic Subject Certificate. MOP emphasizes experiential-based, cross-disciplinary education and provides opportunities to apply traditional coursework to practical hands-on skills through a marine related internship or research project. An Academic Subject Certificate in MOP is a credential awarded to students who earn a minimum grade point ratio (GPR) of 2.0 in 12 credits of academic coursework. This includes four credits of required coursework, six credits of marine related electives, and two credits of independent study to facilitate a unique MOP skill project where students (with faculty guidance) design and conduct a personal marine or aquatic project related to their educational goals. Completion of the MOP certificate will enhance student success in obtaining employment in any occupation where enhanced ocean awareness is applicable, or for further study at a 4-year institution.

Program Student Learning Outcomes for the Liberal Arts degree:

1. Make effective decisions with intellectual integrity to solve problems and/or achieve goals utilizing the skills of critical thinking, creative thinking, information literacy, and quantitative/symbolic reasoning.
2. Ethically, compose, convey, and interpret varied perspectives with respect to an intended audience using visual, oral, written, social, and other forms of communication.
3. Evaluate one's own ethics and traditions in relation to those of other peoples and embrace the diversity of human experience while actively engaging in local, regional, and global communities.
4. Through various modes of inquiry, demonstrate how aesthetics engage the human experience, revealing the interconnectedness of knowledge and life.
5. Explore and synthesize knowledge, attitudes, and skills from a variety of cultural and academic perspectives to enhance our local and global communities.

Student Learning Outcomes for the MOP ASC:

Upon successful completion of the Marine Options Program (MOP) Academic Subject Certificate (ASC), the student should be able to:

Kapi'olani Community College

Action Request Memorandum

November 11, 2014

- Evaluate how the ocean impacts Hawai'i's economy and society.
- Integrate knowledge obtained from marine related course work into their academic degree pathway thereby increasing their appreciation for and engagement in Hawai'i's marine and aquatic ecosystems.
- Develop motivation, initiative and proficiency in their ability to design, conduct, analyze and report (both written and in oral form) a project of their choosing through the completion of the MOP skills project.

Required and elective courses for the MOP ASC:

1. A total of nine credits from the following list of courses:

A. Minimum of one of the following three credit marine survey courses:

- OCN 201 3cr Science of the Sea
- ZOOL 200 3cr Marine Biology

B. Six credits of marine related elective courses from this list:

- BIOL 124 3cr Environment and Ecology
- BIOL 124L 1cr Environment and Ecology Lab
- BOT 130 3cr Plants in the Hawaiian Environment
- BOT 130L 1cr Plants in the Hawaiian Environment Lab
- BIOL 265 3cr Ecology and Evolution
- BIOL 265L 1cr Ecology and Evolution Lab
- GG 103 3cr Geology of the Hawaiian Islands
- HWST 100 3cr Intro to Hawaiian Culture
- HWST 216 3cr History of Surfing
- OCN 201 3cr Science of the Sea (if not counted as the required survey course)
- ZOOL 200 4cr Marine Biology (if not counted as the required survey course)
- ZOOL 200L 4cr Marine Biology Lab

*OCN 101
title needs to
be corrected to
match course
online*

OR any marine related course accepted for the MOP certificate at other UH campuses.

2. One credit from the following course:

- OCN 101 1cr MOP Seminar

3. Two credits from one of the following courses:

- OCN 199V 2cr MOP Skills Project (Independent Study)
- SCI 295BL 2cr STEM Research Experience in Biology and/or Marine Biology

**Kapi'olani Community College
Action Request Memorandum**

November 11, 2014

RECOMMENDED EFFECTIVE DATE: Fall 2015

PURPOSE: The purpose of the proposed MOP ASC is to offer students in any field of study the opportunity to increase their awareness, understanding, and appreciation of the ocean through marine related education and hands-on learning through the completion of the MOP skills project. By offering the MOP ASC at Kapi'olani Community College (KapCC), students can obtain a marine focus to their major while earning an official University of Hawai'i Certificate, which is registered on their transcript for potential employers and admissions officers to see.

SPECIFIC ISSUES: Kapi'olani Community College is the second largest campus in the UH system yet the only campus not to have a Marine Options Program for its students.

The proposed certificate is in keeping with the goal of the UHCC Strategic Plan 2008-2015 to be responsive to State needs:

"The UH Community Colleges will focus on student success by being learning colleges, providing access to quality programs which are affordable, adaptable, flexible, and responsive to the changing needs of students and their communities."

(Goal A)

The proposed certificate also aligns with the KapCC Strategic Plan 2008-2015 in the following outcomes:

STRATEGIC OUTCOME B: Hawai'i's Educational Capital - Increase the educational capital of the state by increasing the participation and degree completion of students, particularly from underserved regions.

STRATEGIC OUTCOME C: Economic Contribution - Contribute to the state's economy and provide a solid return on its investments in higher education through research and training.

The proposed certificate adheres to the following principles outlined in the KapCC mission statement:

- Strives to provide the highest quality education and training for Hawai'i's people.
- Delivers high quality 21st century career programs that prepare students for rigorous employment standards and to meet critical workforce immediate and long-term needs and contribute to a diversifying state economy.
- Prepares students for lives of ethical and social responsibility by offering opportunities for increased service-learning and community engagement.
- Builds partnerships within the University and with other educational, governmental, business and non-profit organizations to support improved lifelong learning.

The MOP ASC is available to any student interested in learning more about the ocean and how it relates to their educational and career goals. It is not intended only for marine science majors although many students curious about a career in marine science will gain initial exposure to the field by acquiring the MOP ASC. In line with the other UHCC campuses, the KapCC MOP

November 11, 2014

hopes to average 6-10 student recruits per year. Many students have expressed interest and are waiting to sign up for MOP at KapCC as soon as the pathway is available.

Resources required for a MOP at KapCC include a faculty coordinator to oversee student progress towards the certificate, as well as communicate with the head MOP office at UH Mānoa to manage award of the certificate. Funding for student projects will come from grants awarded to the central UH Mānoa MOP office, and eventually grants awarded to the KapCC MOP.

BACKGROUND AND CONSEQUENCES: The Marine Options Program (MOP) was started at UH Mānoa in 1970 and became an official UH system wide certificate program approved by the Board of Regents on January 20th, 1972. All certificates awarded by MOP programs are managed by the UH Mānoa MOP office. Since its inception, MOP has spread to every campus in the UH system except for KapCC. The mission of MOP is to “enrich the quality of life of its students and the community by increasing their ocean awareness, understanding, and appreciation through experiential marine-related education.” Each campus houses its own MOP program and coordinator. Students must take a number of marine related courses and complete a MOP skills project to receive the MOP certificate, which is registered on their official transcript. The MOP skills project is initiated while students are enrolled in the required MOP seminar course. This course guides students through the process of creating a project proposal, a resume, and exposes them to the many opportunities for projects and internships available to them. The skills project can range from a research project, an internship or volunteer position, to an art installment or culinary presentation. MOP does not target any specific career path or endpoint, rather it augments all career options by providing a marine related focus unique to Hawai‘i’s intimate relationship with the surrounding sea. MOP offers experiential ocean education for undergraduates in any field of study; it connects students to internships, research projects, jobs, and workshops. Students in the MOP program receive a monthly student newsletter, can apply for scholarships, attend monthly field trips, and when they have completed the MOP requirements, they can present their skills project at the annual MOP symposium.

In the fall 2012 semester, I partnered with the Center for Ocean Science Excellence in Education (COSEE) to administer a simple survey to students in our cafeteria to gauge interest in a MOP program at KapCC. If students were unfamiliar with MOP, we provided information before asking them to complete the survey. A total of 264 students, teachers and counselors responded to our survey. It is clear from the data (see figures 1 and 2, next page) that survey participants were overwhelmingly interested in learning more about Hawai‘i’s marine environment, and interested in a MOP program at KapCC. The addition of a Marine Options Program at KapCC would greatly benefit students from all programs. It will help students set early academic and career goals through their skills project. It can act as a conduit for undergraduate research and enhance our KapCC STEM program. It can act as a pathway to UH Mānoa or UH Hilo. Having an established MOP program at KapCC makes sense because our student body is the second largest in the UH system. We have tourism and culinary programs where students who are pursuing this career pathway wish to have a leg up in the hiring process can demonstrate their intimate knowledge of Hawai‘i’s marine environment through a MOP certificate. In Hawai‘i, there are several local, state and federal government and industry marine science related jobs and MOP can help prepare local students to fill these positions.

**Kapi'olani Community College
Action Request Memorandum
November 11, 2014**

**% respondents interested in Marine
Option Program at KCC**

Figure 1. Of 264 responses, 54% 'agreed' or 'strongly agreed' that they would like to have a Marine Options Program at KCC. 33% were 'undecided'.

**% respondents interested in learning more
about Hawai'i's marine environment**

Figure 2. Of 264 responses, 76% 'agreed' or 'strongly agreed' that they are interested in learning more about Hawai'i's marine environment.

ACTION RECOMMENDED: Approval of the Marine Options Program Academic Subject Certificate effective Fall 2015.
