

June 6, 2013

TO: Institutional Research & Analysis Office

FR: Leighton Oride

Admissions Officer & Registrar

RE: UH Code Request Form: Associate in Science Natural Science

Enclosed find our submission for two (2) new majors with concentrations which were approved at the May 16, 2013 Board of Regents (BOR) meeting.

AS-NSCI-BSC
 Biological Science
 Physical Science

At this writing, the BOR minutes are not yet published.

VC James Dire provided verification of its approval in his email to me of May 30, 2013.

Should you have any questions, please feel free to contact me via email at <a href="loride@hawaii.edu">loride@hawaii.edu</a>.

Thanks.

### UNIVERSITY OF HAWAI'I CODE REQUEST FORM FOR ACADEMIC PROGRAM CODES

REQUESTOR CONTACT INFORMATION		
Date: 6/3/13	Effective term of request (Semester-Year): Fall 2013	ster-Year): Fall 2013
Name: Leighton Oride	Title: Admissions Officer & Registrar	istrar
Campus: Kauai Community College	Office/Department:	
Phone: (808) 245-8226	Email: loride@hawaii.edu	
1. PROGRAM CODE, MAJOR CODE, CONCENTRATION CODE	Bann	Banner forms: SMAPRLE, SOACURR, STVMAJR
Institution: Kauai CC (KAU) College: Instructional	Department:	nt:
✓ New program code ☐ Change/replace existing program code:		
Level: Undergraduate Graduate First-Professional	Post-Baccalaureate Other:	
Degree: Associate in Science	Certificate:	
If requesting an existing Major code and/or Concentration code in Banner:	ler:

III I I V V WITH VITTE I I I I I I I I I I I I I I I I I I	Wi Requirement: At least one Wi course	

<sup>\*</sup> A minimum of 60 credits are required but the total and individual subtotals can vary depending on "double dipping" between general education, electives, and graduation requirements. For example, more than 60 credits may be necessary if WI and Pacific Cultures requirements are not double dipped with diversification requirements or electives. As another example, more than the minimum electives will be necessary if MATH 205 or MATH 206 is applied to FS general education requirement or a required concentration course is applied to natural science diversification. Likewise, more than the minimum concentration credits will be required if PHYS 170 (4 credits) is taken instead of PHYS 151 (3 credits). Double dipping between concentration requirements and electives is not allowed. Students must earn a "C" or higher in all concentration courses and natural science elective courses.

### 2. Program Type: ☐ Associate in Applied Science (AAS) ☐ Associate in Arts (AA) ☐ Associate in Arts—Concentration ☐ Associate in Science (AS) ☐ Associate in Science Natural Sciences—Concentration (ASNS) ☐ Certificate of Achievement (CA) ☐ Certificate of Completion (CC) ☐ Certificate of Completion (CC) ☐ Certificate of Completion (CC) ☐ Academic Subject Certificate (ASC)

3. Program Title: Associate in Science in Natural Science with a Physical Sciences concentration

### 4. Program Description (for catalog):

The purpose of the Associate in Science in Natural Science (ASNS) degree is to address the needs of students interested in science, technology, engineering, and mathematics (STEM). Students can use the ASNS degree to better market their science background or in preparation for transfer to a four-year institution. The ASNS in Physical Sciences provides a clear pathway to properly prepare students for transfer with core introductory courses and laboratories in chemistry, mathematics, and physics typically required in the first two years of a broad range of physical science baccalaureate degrees at four-year universities.

### **Program Admission Requirements:**

Kaua'i Community College (KCC) has an open door policy so that once students are admitted to the College they can designate themselves as natural science students and be in the program.

### **Graduation Requirements:**

Students must complete at least 60 total credits consisting of at least 21 credits of general education requirements and at least 39 credits of discipline-specific science requirements and electives as outlined in the table in item 1. A GPA of 2.0 or higher for all courses applicable toward the degree is needed to meet graduation requirements.

### 5. Program Student Learning Outcomes (PSLOs):

Upon graduation, students will be able to:

- 1. Analyze data effectively using currently available technology.
- 2. Communicate scientific ideas and principles clearly and effectively.
- 3. Analyze and apply fundamental mathematical, physical, and chemical concepts and techniques to scientific issues.
- 4. Apply fundamental concepts and techniques in their chosen natural science field of study, such as biology, chemistry, engineering, physics, etc.

### ASNS General Education Institutional Student Learning Outcomes (ISLOs)

- 1. Written Communication: Write in clear and organized Standard American English to present, explain, and evaluate ideas, to express feelings, and to support conclusions, claims, or theses.
- Oral Communication: Speak in understandable and organized Standard American English to explain ideas, to
  express feelings, and to support conclusions, claims, or theses. Receive, construct meaning from, and respond
  to spoken and/or nonverbal messages.
- 3. Reading: Read, evaluate, and interpret written material critically and effectively.
- 4. Symbolic Reasoning: Use appropriate mathematical and logical concepts and methods to understand, analyze, and explain issues.
- 5. Integrative Thinking: Use problem-solving skills and creative thinking strategies to make connections among ideas and experiences and to synthesize and transfer learning to new and varied situations.
- 6. Information Literacy: Locate, retrieve, evaluate, and interpret the value of information gained from reading text materials, making observations, and using electronic media, and reflectively use that information.
- 7. Technological Competency: Identify, allocate, and utilize technological resources effectively.
- 8. Teamwork: Participate proactively and interact cooperatively and collaboratively in a variety of settings.

- 9. Respect for Diversity: Demonstrate cognitive, affective, and behavioral skills and characteristics that are respectful of others' opinions, feelings, values, and individual expression.
- 10. Ethics: Demonstrate an understanding of ethical issues in public and personal contexts that can be used to make sound judgments and decisions.

Alignment of ASNS program's stated PSLOs with the College's ISLOs.

- 6. Proposed Date of First Offering: Fall 2013
- 7. Is this program offered at another UH campus? 

  ✓ Yes 

  ✓ No 
  If Yes, specify campus. If No, why is this program offered at KCC:

Kapi'olani CC, Leeward CC, and UH Maui College

### 8. Reason for this Program Action:

The ASNS degree addresses the needs of students interested in STEM fields, facilitates transfer to baccalaureate institutions, and fulfills college and system goals.

The ASNS degree encourages pursuit of the degree, highlights options, and reduces time in residence. Students enrolled at the College have continually expressed an interest in pursuing STEM fields and getting an ASNS degree at KCC. There is a clear financial and familial motive. Students can benefit by completing an Associate in Science (AS) degree on-island to save money in tuition fees and by living at home before transferring to a four-year institution.

Enrollment will include an expanded target audience, including high school students, who would be able to move directly into STEM-related fields. KCC currently lacks an AS pathway to transfer into STEM majors, and this may discourages students from attending KCC. Capable and interested high school students would no longer need to

bypass KCC simply because such a pathway to a Bachelor of Science (BS) degree in STEM is not available on Kaua'i.

The ASNS program provides a clear pathway to properly prepare students for transfer to a baccalaureate STEM program. Simply having the program in place allows students to more easily follow pathways towards their desired degree. This will reduce the number of credits a student typically takes before transfer. The program will increase the number of degrees awarded by the colleges since STEM students bypass KCC or often transfer before obtaining a degree at the four-year colleges. Kaua'i CC's ASNS is consistent with the ASNS degrees that already exist at other UHCCs.

Students can use the ASNS to better market their science background or in preparation for transfer to a BS program at a four-year institution. Because of the alignment of the ASNS to baccalaureate programs, it will be easier for students to transfer to four-year programs that are key to careers in STEM-related fields. The proposed curriculum, including both the General Education and required STEM courses in the AS degree, were designed to facilitate articulation with STEM programs at UH Hilo and UH Mānoa. Likely degree pathways in the state include, for example, baccalaureate degrees in Astronomy, Chemistry, Engineering, Geology, Geography, Global Environmental Science, Marine Science, Mathematics, Meteorology, Oceanography, and Physics.

Campus and UH System STEM initiative goals suggest each campus should be doing more to encourage STEM enrollment and STEM degrees. Creating an ASNS will help fulfill the UH System and KCC campus Strategic Plan goal and outcome of "increasing degree completion in STEM fields." The second sentence on the UHCC system webpage states: "All [Community College campuses] offer liberal arts and sciences courses for students preparing to transfer to baccalaureate institutions...". There are national trends that show the importance of a strong STEM program at the community college level. It is reported that 44% of students who successfully completed a bachelor's or master's degree in science or engineering at the beginning of this decade, attended a community college at some point in their education (C&EN, Chemical and Engineering News, Nov. 15, 2010). This was derived from analysis of the National Science Foundation NSF "Characteristics of Recent Science and Engineering Graduates: 2006 (http://www.nsf.gov/statistics/nsf10318/start.cfm).

The ASNS may also fulfill other goals and outcomes: increasing degrees completed, increasing degrees in programs that lead to occupations where the wage is above the US average, and increasing the number of students transferring to UH Mānoa, UH Hilo, and UH West O'ahu.

A 2007 publication from the National Academy of Sciences, "Rising Above the Gathering Storm: Energizing and Employing America for a Brighter Economic Future" describes how increasing the size of the nation's workforce skilled in STEM fields is an important key to our nation's economic future. Hawai'i is no exception in this regard. That is why KCC, UH system, and state (e.g. ACT 111) have put forth initiatives to promote STEM education.

Overall U.S. unemployment remains relatively high, yet STEM industries are an exception. A 2008 study by the Interagency Aerospace Revitalization Task Force (available online) echoed the 2007 National Academies publication: graduates with STEM degrees are in demand. But, the current rate of graduates in STEM fields is projected to fall far short of impending demand. Thus, the ASNS can also help KCC in the workforce development portion of its mission.

Subject: Re: Fall 2013: Associate in Science - Natural Science

It's in the minutes whether they are posted or not. Pearl should be okay with knowing it was approved at that meeting.

The May 16, 2013 minutes have not been posted yet: <a href="http://www.hawaii.edu/offices/bor/archive/">http://www.hawaii.edu/offices/bor/archive/</a>

Do you have any other approval document?

If none, I'll ask IRAO Director Pearl Imada Iboshi if she will accept our IRAO code request forms based on just the contents of this email.

**Great News!** 

Yesterday the Board of Regents approved Kauai CC to start offering Associate of Science in Natural Sciences (ASNS) Degrees. The proposal they approved was a joint submission with Windward CC, Honolulu CC and Hawaii CC. All four colleges can now offer this transfer level degree. which is a better fit for students transferring into STEM bachelor's degree programs than an AA in Liberal Arts. The ASNS degree can also directly lead to gainful employment.

Many thanks to Dr. Steve Taylor for spearheading the KCC effort for the ASNS and Windward's Dean Brian Richardson for leading the four-campus effort.

The ASNS degree offers concentrations in Physical Sciences and Biological Sciences. We can add other concentrations in the future and certificates under this degree.

Aloha nui loa,

James R. Dire, Ph.D. Vice Chancellor for Academic Affairs University of Hawai'i-Kaua'i Community College 3-1901 Kaumualii Highway Lihue, HI 96766
