3. Program Title: Sustainability Science

4. Program Description (for catalog):

The Sustainability Science Certificate of Achievement is interdisciplinary and focuses on understanding and finding solutions to real world problems. It addresses some of the most critical challenges Kaua'i, Hawai'i,

and the world face, and the skills and knowledge students gain in the program provide a solid background in science, math, and other disciplines preparing them for the local workforce and/ or transfer into many different Associate and Bachelor degree programs in the University of Hawai'i system.

Program Admission Requirements:

The student must be enrolled at Kaua'i Community College. Some courses require an approval and/or "C" or higher in ENG 22 and/or MATH 26 or higher.

Graduation Requirements:

A GPA of 2.0 or higher for all courses applicable toward the certificate is needed to meet graduation requirements.

5. Program Student Learning Outcomes:

Detail valid sustainability concerns and potential solutions, the inter-related nature of these concerns, and their implications in an island context.

Identify and describe the basic scientific components behind existing and emerging technologies in a variety of areas related to sustainability.

Demonstrate skills needed to work towards sustainability in a variety of contexts, including collaboration, making presentations, preparing reports, and the use of appropriate science and technology and other information gathering techniques to access information.

Design comprehensive solutions to basic sustainability problems that are well researched and supported.

Use scientific principles or methods to critically evaluate proposed solutions to basic sustainability problems.

6. Proposed Date of First Offering: Fall 2014

7. Is this program offered at another UH campus? Yes No

If **Yes**, specify campus. If **No**, why is this program offered at KCC:

This specific program is not offered at any other campus; however UH Maui College offers a BAS in Sustainable Science Management. This program is offered at KCC in order to address student interest in sustainability topics, to help foster a community of learners on Kaua'i well versed in sustainability problems and solutions, to provide training for jobs, and to provide a pathway for transfer into sustainability fields.

8. Reason for this Program Action:

This program addition will enhance the overall offerings at KCC, responds to student interest in sustainability topics, offers needed workforce training, provides transfer options into various UH institutions' four-year programs, and puts the College in the forefront of the world-wide movement of academic institutions adapting to our changing world and need for an informed and educated society regarding the critical analysis of sustainability problems and finding of appropriate solutions. Students have expressed

interest in sustainability topics, and this certificate program provides an opportunity for students to understand the science behind the issues and prepare himself or herself for further study and/ or the workforce. The curriculum can be used to complement many other Associate degrees, has been aligned with UH Maui College's BAS in Sustainable Science Management, provides a solid base for transfer into other UH system institutions' four-year programs, and local workforce professionals have been consulted and their input has helped to design the certificate in a way that will provide students with the knowledge and skills needed to advance in the workplace. This certificate program offers students the opportunity to be trained in fields that are growing and have many opportunities for advancement and success in both the workforce and further education.

9. **Board of Regents Approval Needed:** Yes No

RECEIVED

SUBJECT: Request Approval of a New Provisional Certificate Program

SPECIFIC ACTION REQUESTED

Request approval of a new provisional Certificate of Achievement (CA) Program in Sustainability Science at Kaua'i Community College.

RECOMMENDED EFFECTIVE DATE

Fall 2015

BACKGROUND

Significance/Contribution of this degree:

The Kaua'i Community College (Kaua'i CC) Sustainability Science certificate program has been designed to target full and part time working, non traditional, and traditional students who are looking for a variety of workforce, career, and educational options. The certificate program is meant to quickly train students in order for them to gain the skills and knowledge needed to work effectively and find a living wage job in a variety of industries related to sustainability. Our classes will be offered in the evening and online thereby making them easier to attend for many students- including off island students. The program has been designed with

the workforce in mind, and industry experts have reviewed the curriculum ensuring its relevance to real world needs. Additionally, the curriculum is articulated with Maui College's BAS in Sustainable Science Management giving students a solid transfer pathway, along with many other transfer options in the UH system. Working professionals who have already earned a degree could enroll in this certificate program to enhance their resume, bring better practices to their place of employment, and possibly qualify for a pay raise. The Sustainability Science certificate program will provide students an opportunity to learn about sustainability and how to implement more sustainable practices into a variety of businesses. This will allow students to enter the local workforce on Kaua'i trained, knowledgeable, and ready to find gainful employment.

A Sustainability Science certificate not only will increase the education about sustainability topics on the island, but also gives students an option for quick workforce training and for some may inspire them to continue in school to earn an Associate and/or Bachelor degree from a UH institution. This certificate program provides students an achievable academic goal that can prepare them for the workforce and set them up for future studies in a variety of subject areas.

Cost and resource allocation/reallocation implications:

Lecturers will be used to teach the courses in this program, and the U. S. Department of Labor Trade Adjustment Assistance Community College and Career Training (TAACCCT) grant, round two, has provided funds for a full time program coordinator, currently on year two of funding from the grant. No additional faculty funding is required, and tuition revenues will be used to cover lecturer costs after grant funds have been expended. While faculty cost is included in the cost analysis, there is no additional cost to the college. Grant funds have also provided start up equipment for the classes, and a computer, printer, and other needed items for the program coordinator.

Impact of new program on campus budget allocations and mission priority

The proposed new program will have little impact on the campus budget allocation. Lecturer funds will be used to hire lecturers to teach the sustainability content courses, and general education offerings will be used to complete the program. We do not expect additional

sections of general education courses to be needed, based on our projected enrollment. The program will have no impact on the campus mission priorities as it speaks to the campus and UH recognition of the importance of sustainability.

Demand projections:

Kaua'i's job growth is projected to grow faster than all other islands through 2020, according to the Hawai'i Department of Labor and Industrial Relations. The main area of growth is in tourism, as expected, however water treatment operators, recyclable material collectors, manufacturing, and construction are all industries that are expected to increase as well. This certificate program is meant to give a broad education on a variety of subject areas thereby not pigeonholing the student into one area. Sustainability concepts can be incorporated into many jobs, and companies are increasingly looking for more employees qualified in these areas. Additionally, specific sustainability manager jobs are definitely on the rise, and these jobs can be secured with more education in the field of sustainability. Our students will walk away with the skills to earn a living wage at a job they can succeed and progress in.

Accreditation impact (if any): There will be no impact on ACCJC accreditation.

Examples (2-3) of similar models from peer institutions:

Maui College: BAS Sustainable Science Management

Central Carolina Community College: AAS Sustainability Technologies

Central Piedmont Community College: AAS Sustainability Technologies

Similar programs at other UH campuses (if there is duplication, why is this program necessary):

Maui College's BAS in Sustainable Science Management is the most similar program to ours, and our program is meant to align with theirs so our students can transfer into this program if that is their goal. This program is necessary on Kaua'i to increase education on Kaua'i about sustainability problems and solutions and to train students for jobs in various areas. This certificate program aims to increase the number of qualified applicants in a variety of areas, and also provide the student/ applicant with the skills and education needed to advance in the workplace once there. In talking with industry experts, it has been expressed to sustainability

staff at Kaua'i CC that applicants can be hired with only a high school degree, but these employees are often not able to advance to the higher pay grades because of a lack of basic science and math knowledge. This certificate program aims to address this problem, and give our students the opportunity to find jobs they can advance in. This certificate program enables Kaua'i CC to respond to these community needs and provide residents the opportunity to find living wage jobs that can support a family.

This certificate program also contributes to the current strategic priority focusing on STEM degrees and certificates and will hopefully increase retention and persistence by giving students an achievable goal. The proposed Sustainability Science CA will add to the number of Kaua'i CC students graduating with a STEM certificate. The Kaua'i CC Sustainability Science certificate program will also contribute towards the following UHCC strategic plan measures:

- Degrees and certificates awarded
- Degrees and certificates awarded to Native Hawaiian students
- Degrees and certificates awarded to students in Science, Technology, Engineering, and Math (STEM) fields

ACTION RECOMMENDED

Request approval of a new provisional Certificate of Achievement (CA) Program in Sustainability Science

need to follow the reserve policy, as well as to take into account UH Foundation funds that can be used to be budget relieving.

Vice Chair Sullivan stressed that the Board would not have supported using revenue bonds had the true fiscal health was known, and that a discussion on UH Mānoa finances is a topic that will be vetted at an upcoming Budget and Finance committee meeting.

Chancellor Bley Vroman added that historically the trend was to spend to keep from being swept; the excess was helpful in funding the shortfalls, but now the units have been charged to 'fly level,' and have budget plans, and restructure curricula and class size for efficiency. All are on task and the board will be kept apprised of the progress.

The Board raised concerns about negative impacts on the ability to graduate, admissions, and the quality of education, and raised the possibility of incentivizing units to 'fly level,' and suggested considering a budget allocation committee to work on an allocation system to provide incentives.

Upon motion by Vice Chair Sullivan to approve with the amendment to the CIP request relating to the Daniel K. Inouye Center to include \$1,000 in place of the \$1.00 figure as a placeholder until the operating budget is finalized, seconded by Regent Gee, the motion carried unanimously with one abstention by Regent Hoffmann.

J. University of Hawai'i Foundation: Approval of Naming Opportunities for Gartley Hall at UH Mānoa

Vice President for the University of Hawai'i Foundation Gregg Willems presented a proposal for naming opportunities for Gartley Hall at UH Mānoa. He summarized the minimum levels and that the building has been completely renovated and therefore the entire internal platform is available. The naming for the exterior building is subject to Hawai'i law.

Vice Chair Bal moved to approve as presented, seconded by Regent Nielsen, and the motion carried upon unanimous vote.

K. By Consent Agenda:

1. University of Hawai'i—West O'ahu: Approval of Provisional to Established Status, Certificate in Risk Management & Insurance

2. Kaua'i Community College: Approval of a New Provisional Certificate of Achievement Program in Sustainability Science

Chair Moore stated that the items were already discussed in committee, and reported on by the committee chair. Unless there were questions or members wanted to take any item individually, the items are now before the board by consent agenda. Having

no objections by the Board, Regent Gee moved to approve, seconded by Regent Matayoshi, and the motion carried upon unanimous vote.

IX. Executive Session (closed to the public):

A. Matters Related to Private Donations: (To consider matters relating to the solicitation and acceptance of private donations to HRS §92-5(a)(7))

1. Approval of Private Donation to Support the University

B. Personnel Actions Related to the Following Positions: (To discuss the following personnel matters pursuant to HRS §92-5(a)(2))

1. Discussion of Personnel Actions (Attachments B-1 and B-2)

Upon motion by Regent Kudo, seconded by Regent Matayoshi, and by unanimous vote, the board moved into executive session at 1:10 p.m. Upon motion by Vice Chair Sullivan, seconded by Regent Kudo, and by unanimous vote, the executive session was adjourned at 3:30 p.m.

The meeting reconvened at 3:40pm. Chair Moore stated that the Board went into executive session to discuss confidential matters regarding personnel and private donations as indicated on the Agenda.

X. Personnel Actions - Attachments B-1 (For approval), B-2 (Information only)

President Lassner presented the personnel matters listed on the attachment B-1 for approval by the Board. The Board expressed confidence in the selection process for the Chancellor of Maui College and appreciated the letters of support from persons who knew the candidate, and that listing the relevant characteristics for the position was helpful in decisionmaking. Upon motion by Regent Matayoshi to approve the personnel actions listed in Attachment B-1, and seconded by Regent Nielsen, the motion carried upon unanimous vote.

XI. Announcements and Adjournment

Chair Moore noted that the board retreat will be on November 7, 2014, 8am – 5pm, tentatively at the Sullivan Conference Center, University of Hawai'i Cancer Center; and the next regular board meeting would be on November 20, 2014, at Leeward Community College. Having no further business, upon motion by Regent Gee, seconded by Regent Kudo, and by unanimous vote, the meeting adjourned at 3:51 p.m.

Respectfully Submitted,

/S/

Cynthia Quinn
Executive Administrator and
Secretary of the Board of Regents
