Hi Pearl,

Our certificate of competence in Database Support is a closer match to this CIP code: 11.0802 Data Modeling/Warehousing and Database Administration. What else do you need?

Detail for CIP Code 11.0802

 [Print](#)

Title: Data Modeling/Warehousing and Database Administration.

Definition: A program that prepares individuals to design and manage the construction of databases and related software programs and applications, including the linking of individual data sets to create complex searchable databases (warehousing) and the use of analytical search tools (mining). Includes instruction in database theory, logic, and semantics; operational and warehouse modeling; dimensionality; attributes and hierarchies; data definition; technical architecture; access and security design; integration; formatting and extraction; data delivery; index design; implementation problems; planning and budgeting; and client and networking issues.

Title: Data Processing and Data Processing Technology/Technician.

Definition: A program that prepares individuals to master and use computer software programs and applications for inputting, verifying, organizing, storing, retrieving, transforming (changing, updating, and deleting), and extracting information. Includes instruction in using various operating system configurations and in types of data entry such as word processing, spreadsheets, calculators, management programs, design programs, database programs, and research programs.

I have no problem with that, however that sounds like more of a question for Banner--will Banner recognize that there is a difference between a 9 credit certificate and a 60 credit degree if it has the same code?

Yes, but Banner is asking if the same codes be used for the certificates as are used for the concentrations rather than create new codes that mean the same thing?

Hi Pearl,

The difference between the Certificates of Competence (CO) that we are requesting and the concentration codes that are already attached to the Leeward AS degrees in ICS (DSSP, ISSP, MDSP, NSSP & SDSP), is that the COs are 9 credit certificates which students can earn, rather than a 60 credit AS degree with a concentration in one of those areas.

In the community colleges, it is standard practice to offer small certificates like these five, that are "stackable" by which earning a certificate helps the student to earn credits towards completing a larger degree program such as 60 credit AS in ICS.

Let me know if this works or if you need more information.

Thanks,

Jim
